Longview Solutions

Longview Solutions provides corporate performance management (CPM) and tax provisioning software that leading companies such as Trustmark, Time Warner, Home Depot, Eaton, Welch's, and Integrys use to drive performance with speed, visibility and financial integrity. Since 1994, many of the world's most respected companies have been using Longview to create a single repository of financial truth from which statutory consolidation, management reporting, financial close and XBRL reporting, financial planning, modeling, analysis, budgeting, forecasting and tax provisioning and reporting can be performed quickly and accurately, enterprise-wide. Longview is an Exact company headquartered in Toronto, Canada with additional offices in Philadelphia, Chicago (USA) and London (UK).

Position Overview

The Senior Implementation Specialist is an individual with a software background combined with application delivery experience implementing CPM or Finance ERP solutions in a large company environment. The candidate will work with 'Global 2000' customers who are utilizing Longview's products and services to expand and improve their capabilities to meet today's CPM challenges. Longview's consultants work directly with customers during the implementation process to consult in the design, building and testing of a wide range of financial analysis and reporting tools.

This full-time position consists of project based work. The typical implementation project is 3-6 months in duration. Travel of 60-80% is required. Communication, organization and leadership skills are a must. Experience with software implementations and an accounting background are pluses.

Summary of Responsibilities

- Participate in the setup, configuration and unit-testing components of customer solutions based on design specifications
- Participate in the execution and support of system test activities
- Develop a thorough understanding of the technical environment
- Provide direction and mentoring to customer and Longview project staff
- Work with the project manager on issue management and resolution
- Extended periods of travel
- Grow into increasingly more responsible positions within the Client Services organization

Skills Requirement

- Bachelor's degree in MIS, Computer Science or related field preferred, or equivalent work experience. A minor in accounting is a plus.
- Two to three years of programming, implementation or related experience
- Strong communication, presentation, analytical and interpersonal skills and an ability to work independently in a dynamic environment
- Excellent communication/presentation, analytical and interpersonal skills
- Superior leadership skills

- People management
- Development skills including HTML and Java Script. Business Intelligence or data integration experience is a plus
- Learn rapidly and with limited guidance
